Tanaboon Jewriyavetch

Software Engineer
tanaboon.jew@gmail.com | github.com/TanaboonJew | linkedin.com/in/tanaboonjew

PROFESSIONAL EXPERIENCE

Systems-oriented and cross-platform software

- Command-line and desktop software across Linux and Windows, focused on reliability.
- Build, CI, and test automation using scripting and container tooling.
- Root-cause investigation with regression coverage for CLI, GUI, and integration behavior.
- Developer tooling and human-reviewed AI-assisted engineering workflows.

EDUCATION

Thammasat University

B.Eng. in Computer Engineering | 2025

SELECTED PERSONAL PROJECTS

FinPlan

Public local-first finance toolkit with a tested finance engine and browser-local state.
Personal stack: TypeScript, Next.js, Zustand, Vitest

Passenger Princess

Pre-release Cyberpunk 2077 passenger-meetup mod with defensive lifecycle cleanup.
Personal stack: Lua, Cyber Engine Tweaks, Codeware, redscript

PhotoModeOutfit-Songbird

Photo Mode outfit mod with repeatable resource preparation and release validation.
Personal stack: Python, ArchiveXL, TweakXL, WolvenKit

PROFESSIONAL / ESTABLISHED SKILLS

Languages: Rust, Python, Bash/POSIX shell, PowerShell, JavaScript, Groovy, HTML/CSS
Frameworks: PySide6/Qt, pytest/pytest-qt, Tokio, Serde, Clap, GTK4/Libadwaita
Platforms & tools: Linux, Windows, Git, Jenkins, Docker, Cargo, Python packaging
Engineering: testing, CI/CD, build automation, debugging, reliability, documentation
